GCI34 Conestoga Pepper (P).

Pepper is an Odensim Paul son from the Anrohda Leben (P) cow. We used Pepper in our stud herd to open heifers and expect his calves this summer!

Pepper has fantastic ebv's and has a +7 for Milk.

GCI39 Conestoga Emblem. Emblem is a Mont-Beau son from Taaiboschspruit Vula which was one of my best stud cows. Inserted pic is his half sister Vivian and her Zagreb calf. Emblem also has another half brother Anroda Marula DAR0520 that sired 70 odd calves for the Anroda stud. We used Emblem in our commercial herds as a two year old.

The Conestoga Simmentaler bulls have been running and working at our Kokstad farm for two years now and have survived what must be close to the worst red water farm in EG. We prepared them with Silage and have them in good hard working condition.
